Determining Group Size

Small Group and Hybrid product eligible groups are any employer group with 2 to 50 eligible employees (including full-time equivalents). Groups of 2 to 50 eligible employees are also eligible for the Memorial Hermann Hybrid product.

Large Group is any Employer group that averaged at least 51 eligible employees during the preceding calendar year. The eligible Employee count includes the Full-Time Equivalents (FTEQ), determined by the federal Shared Responsibility rule. The calculation of the FTEQ requires that the Employer add up all service and work hours of all part-time employees, then divide by 120. The end result is the number of “Full Time Equivalent Employees”. This number is added to the “full time employees”, and if the result is > 50 total employees, then the group is considered a “Large Group” for rating and underwriting purposes.
